LinkedIn: [bhaskar.neogi](#) | **Website:** [Personal Portfolio](#)

Location: Newtown, Kolkata, 700163

Languages: English, Bengali, Hindi

Software Engineer with 5.5+ years of experience in building responsive, high-performance web applications using React.js, Javascript, Typescript, HTML5, CSS3. Skilled UI/UX development, RESTful API integration, cross-browser compatibility, performance optimization and clean, maintainable code in agile environment.

Technical Skills:

- **Web Technologies:** HTML5, CSS3, Bootstrap
- **JS Library/Framework/Environment:** React JS, React Native, Angular, Node JS, Redux
- **Programming Languages:** Javascript, Python
- **Tools & Platforms:** GitHub, Bitbucket, Azure Devops, GitLab, JIRA, Azure Devops, ClickUp
- **IDE :** Visual Studio Code, Sublime Text

Work Experience:

- ❖ **Software Engineer-Frontend at NextZen Minds Technologies Pvt Ltd, Kolkata**

[March 2026 – Present]

▣ Project Name: TDSG

UI Tech stack: React, Vite, Ant Design, Zod, Vitest, Typescript

Project Details: Centralized organization management system that provides a dashboard-driven interface to manage user access, organizational hierarchy, and workflow approvals across organization hierarchy.

Responsibilities:

- Developed scalable frontend architecture using React, Vite and Typescript.
- Implemented Microsoft SSO authentication and role-based access control (RBAC)
- Built dynamic dashboards with drag-and-drop widgets and layout persistence
- **Led a team of 3 frontend developers** in implementing complex business workflows, including dynamic forms, decision trees, and hierarchical process control,
- Created reusable components and optimized performance.

- ❖ **Frontend Developer at NextZen Minds, Kolkata** [August 2024 – March 2026]

▣ Project Name: HawkShield

UI Tech stack: React, Material UI, Formik, Yup, Javascript

Project Details: HawkShield fills the gap of collaboration at Zero Trust to give enterprises a complete data security platform that is more secure, smart, and efficient than traditional security solutions.

Responsibilities:

- Designed, developed, and maintained modular and reusable UI components to ensure consistency and scalability across the application.
- Implemented end-to-end encryption and decryption for email content and all shared file types, ensuring data security and compliance.
- Integrated support for viewing, watermarking, and downloading various file formats through a custom-built internal viewer, enhancing user accessibility and experience.

❖ **Programme Analyst at CBNITS India Private Limited, Kolkata [Sep,2021 – July,2024]**

□ **Project Name: Swift Security**

UI Tech stack: React, Material UI, Typescript, Micro-Frontend, Module Federation

Project Details: A cloud security platform comprising modular components that address various aspects of security and management, providing a robust framework for handling diverse security challenges in cloud environments.

Responsibilities:

- Developed reusable components and various graph representations in accordance with UX.
- Utilized Jotai to ensure seamless data flow throughout the micro-frontend application.
- Implemented proper route and navigation structures for enhanced user experience.
- Integrated APIs with UI components to enrich functionality and user interaction.

□ **Project Name: Usage Insights**

UI Tech stack: Angular 11, VDL, Typescript

Project Details: Usage Insights is a data analytics platform that provides visibility into data usage, storage, and management within an organization's IT infrastructure.

Responsibilities:

- Upgradation from Angular 7 to Angular 11.
- Improved Code architecture and handle data flow throughout the product.

□ **Project Name: Squadcast**

UI Tech stack: React Native, Native Base, React Query, Typescript

Project Details: Squadcast is an incident management platform built on DevOps and SRE practices that simplifies incident handling, improves alerting, and enables faster collaborative incident resolution.

Responsibilities:

- Implemented functional UI features and ensured seamless connectivity through robust routing and navigation structures.
- Used React Query to seamlessly integrate APIs, enhancing application functionality and performance.

❖ **Internship at CBNITS India Private Limited, Kolkata [April 2021 - Sep 2021]**

□ **Project Name: i2Chain**

UI Tech stack: React, Material UI, Javascript

Project Details: A security platform for securely chaining, reading, and sharing files, with integration across private and public cloud services like Google Drive, OneDrive, Dropbox, and SharePoint.

Responsibilities:

- Implementation of UI aligned with UX specifications, emphasizing seamless navigation.
- Integrated APIs to augment platform functionality, ensuring optimal performance.
- Development of Redux architecture for streamlined data management and flow control.

• **Academic Qualification:**

Bachelor of Technology (B.Tech) – Computer Science,
Maulana Abul Kalam Azad University of Technology (MAKAUT), West Bengal, India
